EDUCATION

University of Houston

May 2027

Bachelor of Science in Computer Information Systems, Minor in Business Administration

3.30

Awards/Honors: Dean's List x 4, Cargill Thrive Scholar, Kamala Scholar

Relevant Coursework: Database Management, Data Structures & Algorithms, Systems Analysis and Design, Systems Networking & Infrastructure, Statistics

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL

Frameworks / Libraries: React, Angular, Flask, Git, Linux, Wireshark, VS Code

Cloud & DevOps: AWS (RDS, Aurora, IAM), REST APIs, GraphQL, WebSockets, Cloud Architecture Fundamentals

AI Tools: Claude Code, Cursor, GitHub Copilot, Codex, Gemini, AWS Kiro

Certifications: AWS Certified Cloud Practitioner; CodePath Data Structures & Algorithms; Extern Web3 Security & Data Analytics; Intro to Cluster Computing (UH, Mar 2026); Get Started with OutSystems and AI (MindSmith)

WORK EXPERIENCE

Cloudflare

Austin, TX

Technical Support Engineering Intern

May 2026 – Present

- Diagnose and resolve technical issues across Cloudflare's product suite, including CDN, DNS, Workers, Zero Trust, and DDoS mitigation, for enterprise customers with high-availability requirement

University of Houston

Houston, TX

Computer Lab Assistant

August 2024 – Present

- Maintain and troubleshoot 50+ lab workstations, diagnosing software, system, and network issues to ensure reliable computing access for students and faculty
- Apply OSI-layered troubleshooting to resolve technical failures during campus events to minimize downtime

Cisco Systems

Chicago, IL

Network Support Engineering Intern

May 2025 – Aug 2025

- Resolved 80+ customer cases with outstanding customer satisfaction (CSAT) scores while collaborating with senior engineers to deliver scalable network solutions
- Led and delivered technical solutions for enterprise client's valued at \$300k+, configuring and troubleshooting networking technologies including BGP, TCP/IP, NAT, VLANs, DHCP and firewall policies

PROJECTS

Beat The Market Portfolio Simulator (JavaScript, HTML/CSS, Finnhub API, AWS S3) [Live Demo](#)

- Built an interactive stock portfolio simulator enabling users to construct equity allocations and evaluate performance against the S&P 500 benchmark (SPY) using real-time data from Finnhub financial API
- Deployed the application on AWS S3 static website hosting, creating a publicly accessible cloud-hosted financial analytics tool

AI CLI Assistant (Python, Groq API, Streamlit)

- Developed a Python-based CLI assistant using a large language model (LLM) APIs to streamline troubleshooting of the Cisco Catalyst switches reducing diagnosis time for the network support engineers by approximately 80%
- Created a customer-facing onboarding video to simplify switch setup and align technical delivery with user needs

Cloudflare Workers AI Chatbot (Cloudflare Workers, Wrangler CLI, Llama 3.1)

- Deployed a serverless AI chatbot on Cloudflare's global edge network using Wrangler CLI, integrating Meta's Llama 3.1 model via the Workers AI API for low-latency inference at the edge
- Designed multi-turn conversational inference by managing environment bindings, routing config, and chat state, enabling a live publicly accessible deployment on the workers.dev domain

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

AWS Student Builder Group

Houston, TX

Technical Education Coordinator

March 2026 – Present

- Facilitate hands-on AWS workshops by troubleshooting real-time issues, guiding cloud setup, and supporting members in building practical cloud and certification skills
